WORK EXPERIENCE

Cigna Group   Bloomfield, Connecticut
Software Engineer | Analytics Catalog Engineering   *July 2023 – Present*
- Developed and maintained a reusable Typescript-based React component library with Storybook and MaterialUI, enhancing developer productivity, consistency, and reusability across multiple teams.
- Increased curated data objects by 80% by developing an internal application with Python & React to automate metadata retrieval from source and target systems by applying rules to transfer and enrich metadata.
- Successfully upgraded AWS infrastructure with a 90% success rate, leveraging Terraform scripts to streamline and automate the process, resulting in improved efficiency, reduced downtime, and enhanced overall system reliability.

Alation   Redwood City, California
Software Engineer | UI Documentation & Data Governance   *August 2021 – June 2023*
- Developed a new feature known as the Data Governance Marketplace application platform using TypeScript, React.js, styled-components, and JEST, contributing 10M dollars in new ARR.
- Coordinated with UI/UX stakeholders to create a React component library using MaterialUI, TypeScript, and Redux leading to a more scalable design and a 65% increase in unit and integration test coverage.
- Designed and built new React component libraries and optimized Redux modules, enabling the successful delivery of Glossaries and Terms and significantly enhancing customer experience, adoption, and satisfaction.

Partner Operations Manager | Alation Partner Network   *November 2019 – August 2021*
- Designed, implemented, and integrated Salesforce, Tableau, Alation, and Impartner to support the partner sales team, leading to a $20 million increase in the partner-generated pipeline.
- Developed, managed, and reviewed partner program courses for learning Alation and extending Alation using APIs, increasing partner certifications from 0 to 150.
- Built and managed the analytical technical infrastructure that supports partner reporting dashboards, using SQL queries and Tableau reports to analyze partner activity.

Sales Development Representative | Inbound, Outbound,& Install Base   *May 2018 – November 2019*
- Attained an average of 114% of sales quota by prospecting and qualifying new business, which generated $3.4M in the pipeline for Account Executives.
- Led the creation of a Customer SDR program to increase user adoption, reduce churn, and expand customer accounts by spreading awareness to different departments, reducing churn by 15%.
- Interviewed, onboarded, and trained 10 SDR's by supporting calls and holding training sessions to ramp up SDRs in a 30-day timeline.

PROJECTS

Age of Sigmar Warhammer Tracker, Github
April 2024 – Present
- A platform to connect Age of Sigmar players for TTS matches. Users can authenticate securely with Firebase, find opponents, and schedule games. The app integrates with Discord to notify players about scheduled matches and uses SendGrid for email reminders.
